

CRISTAL GLOBAL PLANT — CONTAMINATION CONCERN

1. 769. Hon SALLY TALBOT to the minister representing the Minister for Environment:

I refer to the minister's answer to question on notice 5731 regarding monitoring of contamination at the Cristal Global site in Australind.

- (1) As part of the Department of Environment and Conservation's role in monitoring progress on contamination and remediation, does it visit the site and carry out any testing?
- (2) If no to (1), how is this monitoring carried out?
- (3) If yes to (1) —
 - (a) what type of testing is carried out;
 - (b) when was the last testing done; and
 - (c) what are the results?

Hon HELEN MORTON replied:

I thank the member for some notice of the question.

- (1) No.
- (2) The Department of Environment and Conservation monitors progress on the investigation and remediation of the Cristal Global site by reviewing reports from the company's consultants and the contaminated sites auditor, which are prepared and provided to DEC in response to classification of the site under the Contaminated Sites Act 2003 and to comply with the premises' licence under the Environmental Protection Act 1986.
- (3) Not applicable.
