

WATER — WA COLLEGE OF AGRICULTURE, DENMARK — SCHEME WATER USAGE

5006. Mr D.J. Kelly to the Minister for Water:

- (1) Is the WA College of Agriculture in Denmark using scheme water for its dairy farm despite having a dam specifically for this purpose?
- (2) If yes, why and how much scheme water has been used each month for the last year?

Ms M.J. Davies replied:

- (1) Water Corporation provides scheme water to the WA College of Agriculture in Denmark through one master meter. Water is then distributed throughout the campus via the college's own plumbing.
- (2) The average monthly volume of scheme water supplied through the master meter in Denmark in 2015 was 1 088 kilolitres.
