

WATER CORPORATION — ENGINEERING AND CONSTRUCTION BRANCH SALE —
RCR TOMLINSON PROJECTS HANDOVER

5607. Mr D.J. Kelly to the Minister for Water:

I refer to the sale of the Water Corporation's Engineering and Construction branch in 2015, and ask can the Minister please provide:

- (a) a list of all the projects handed over to RCR Tomlinson as a part of the sale;
- (b) an indication of which of those projects were categorised as "guaranteed work" and which of those projects were categorised as "transitional work";
- (c) the estimated cost of each project at the time of handover;
- (d) the predicted out-turn for each project on completion;
- (e) the profit margin amount to RCR Tomlinson for each project;
- (f) the management/overhead fee payable to RCR Tomlinson for each project; and
- (g) the expected completion date for each project?

Ms M.J. Davies replied:

- (a)–(c) As part of the sale process, the guaranteed work over three years represents new projects for the Water Corporation. In addition, it was agreed that a number of jobs in various stages of completion by Engineering and Construction Services at the point the sale transacted (transitional work), would be completed by RCR Tomlinson. [See tabled paper no 4518.].
- (d)–(e) This is a matter for RCR Tomlinson.
- (f) I am advised the management/overhead fee is detailed in the contract of sale and covered under its confidentiality clause.
- (g) [See tabled paper no 4518.].
