

KEMERTON INDUSTRIAL PARK, WASTE DISPOSAL

742. Mr GRILL to the Minister for Resources Development:

- (1) Will the Minister indicate the location of the sites identified for the disposal of solid waste generated by industry attracted to the expanded Kemerton Industrial Park?
- (2) Will the Minister explain how the liquid waste, if produced by industry in the Park, will be disposed of?

Mr BARNETT replied:

- (1) No sites have been identified for the disposal of solid waste generated by industry at Kemerton Industrial Park. However, a study is in progress which will place options before Government which could in time lead to identification of a suitable site.
- (2) The Department of Resources Development is currently working with the Water Corporation to identify the preferred method of disposal of any liquid waste that may be generated by future industries which may develop at Kemerton Industrial Park.
