

HOON DRIVERS — COVERT CAMERAS

**7. Hon SALLY TALBOT to the Attorney General representing the Minister for Police:**

- (1) Have the specialised covert hoon cameras promised by the government been purchased yet?
- (2) If so, where are they currently installed; and, if not, why not?
- (3) How many hotspots have been identified for specialised covert hoon camera locations in Mandurah and Dawesville?
- (4) Where are these hotspots?
- (5) How many hoons were reported by residents in the Mandurah and Dawesville areas in each month between September 2014 and January 2015?

**Hon MICHAEL MISCHIN replied:**

On behalf of the Minister for Police, I thank the honourable member for some notice of the question.

- (1)–(2) The specific camera that is to be purchased has been identified. Western Australia Police is currently in the process of obtaining the cameras.
- (3)–(4) No decisions have been made about locations for the deployment of covert hoon cameras.
- (5) The answer is in table form. It is not a particularly long table, but by way of summary, the total for Dawesville over the months of September, October, November, December and January is 14 and the total for Mandurah over the same period is 24. The member will be able to see the details when she reads *Hansard*.
