

FREMANTLE PORT — LEAD EXPORT

256. Hon SALLY TALBOT to the Minister for Environment:

I refer to the transport of lead through the port of Fremantle and the minister's statement in this house last week that nothing will leave the mine site until such time as she has approved two additional plans referred to in her environmental conditions. These are health, hygiene and environment monitoring and management programs and the emergency response plan.

(1) Will the minister table these plans?

(2) If not, why not?

Hon DONNA FARAGHER replied:

I thank the member for the question.

(1)-(2) I cannot table those plans at the moment because they are with the department for assessment.
