

TWO ROCKS MARINA, CONTAMINATION AT FORMER FUELLING SITE, REPORT

1328. Hon. C.L. Edwardes to the Minister for the Environment and Heritage

(1) Now that the Minister has tabled the confidential report by CSBP on the ground water contamination (3 April 2003), will the Minister now table the confidential report by Yanchep Sun City (Toku) on the contamination at the former fuelling site at the Two Rocks Marina?

(2) If not, why not?

Dr J.M. EDWARDS replied:

(1) A copy of the Detailed Site Investigation (Phase II) Report has been made available in the Two Rocks/Yanchep Public Library (Phil Renkin Library) for public review since late 2002. This report details the environmental investigations undertaken at the site, confirms the nature and extent of soil and groundwater contamination and provides the recommendations for the clean-up and management of the contamination.

In addition, an update sheet prepared and distributed to the local community via letter drop by Creating Communities, on behalf of Caltex and Yanchep Sun City, in mid April 2003 provided an update on the remediation works, and reiterated that a copy of the report is available in the library and provided the number of the toll free project information line.

An advert has also been placed in the local newspaper to advise of the proposed remediation works at the site.
