

HEALTH SERVICES, VASSE

699. Mr Masters to the Minister for Health

- (1) I refer to the statement made by the Vasse ALP candidate that 'health funding in Vasse would be increased' and ask will the Minister honour this commitment to meet the rapidly expanding needs of Vasse?
- (2) If yes, what new and existing services will benefit from the increased funding?

Mr KUCERA replied:

- (1) Yes.
- (2) Community based services to provide home visiting services to mothers/families with young children and allied health services such as speech pathology. The Department of Health and the Vasse Leeuwin Health Service is currently discussing the configuration of activity and the profile of activity which will best meet the health needs of the community.
