

KIMBERLEY CONSERVATION STRATEGY

460. Hon SALLY TALBOT to the Minister for Environment:

What will the \$700 000 earmarked in the budget year 2010–11 and the \$1 million in each of the following two years for new works under the Kimberley conservation strategy be spent on?

Hon DONNA FARAGHER replied:

I thank the member for some notice of this question. The state government has committed \$9 million to develop the Kimberley science and conservation strategy, which will include a range of initiatives to enhance conservation outcomes across the Kimberley region. The \$2.7 million allocated under new works is the capital funding component of the strategy.
