

KALAMUNDA DISTRICT COMMUNITY HOSPITAL, CLOSURE

553. Mr DAY to the Minister for Health:

I am a little concerned by the minister's answer. I asked the minister whether he could categorically rule out the recommendation contained in the substantial document that I understand has been provided to him. Can the minister categorically rule out the closure of Kalamunda District Community Hospital now or at any time in the future?

Mr KUCERA replied:

I have already answered that question. A reform process is in place which involves the configuration of all health services throughout this State. I have already made that clear. In relation to the writing of reports, I expect people within the health service to continuously write reports.
