

LEGISLATIVE ASSEMBLY ESTIMATES COMMITTEE A

Correction of Answer — Division 15

MR D.J. KELLY (Bassendean — Minister for Water) [4.11 pm]: I rise under standing order 82A. On Thursday, 23 May 2019, during the estimates committee A hearing on science, service 1 of division 15, the deputy director general advised that the LNG Future Energy Cooperative Research Centre would be hosted by the University of Western Australia with a facility to be located in the Pilbara. I now advise that the current proposal has the facility located in the Kwinana industrial area, next to compressor station 10 on the Dampier–Bunbury pipeline and near the Australian Centre for Energy Process Training in Munster. There is a strong possibility that other related facilities operated or used by the CRC will be located in the Pilbara, given its focus on both hydrogen and LNG.
