**Subject:** Draft transcripts of evidence - reply from Brad Richardson

Further to my evidence I can confirm;

1. That there are no transcription errors, other than the minor typo on the attached closed session - scanned page attached; and
2. I would like to clarify one statement I made at page 7, as detailed below.

*.....What is, I think, very positive out of this project is that I am not hearing a lot of noise that the end users are saying the building is not fit for their purpose. I am not hearing that and, having come from the state of Queensland where the kids' hospital over there did have some of those issues, (to provide additional clarity to this statement, the issues I referred to are those reported by the media, specifically relating to complaints from clinical staff generated by some of the commissioning and handover processes on the Queensland project. I did not intend to convey that the Children's Hospital in Queensland had significant defects arising from its construction. As far as I am aware, it did not.) / think that is a really big tick for the model here.....*

If you have any questions I am contactable on my mobile listed below.

Regards Brad
