Country beds and Inpatient Mental Health Units

Data in the table below includes Inpatient Mental Health Units. Flexible (or residential aged care) beds located within WA Country Health Service hospitals or facilities have been included.

Data for country hospitals or facilities is updated on a monthly basis or as operational changes occur.

Monday, 28 February 2011

Country region	Hospital / facility	Sameday		Overnight

Supplementary information:

Bed numbers provided reflect the community need and demand rather than potential physical capacity of the facilities. Carnarvon day surgery beds are activated as required for visiting specialist services. Broome is currently undergoing redevelopment so available bed numbers are variable. Kalgoorlie Hospital have recently reconfigured inpatient facilities following the opening of a new Palliative Care Unit and Outpatients Clinic, and in preparation for the second stage of the Hospital redevelopment scheduled for commencement early 2011.

- **Beds:** The total number of beds allocated for use by a hospital patient within the hospital or facility.
- **Beds ready or in use:** Beds that are currently being used or are immediately available for use within the hospital or facility. A bed is immediately available for use if it is located in a suitable place for care with nursing and auxiliary staff available.
- Data is provided for every month.
- Where N/A is displayed, data is not available or the bed count does not apply to these hospitals or facilities.
- Where there are no figures shown in the % change column this indicates that a value is divided by 0. This means that a calculation is not possible.
