Subject: Airfares

I would like to submit my view on the exorbitant price of air fares to regional WA.

It is very hard to accept that I am paying the same price for a return trip from Kununurra to Perth as an international flight to Europe, depending on the season! Three times as much for an intrastate flight as an interstate flight.

I understand it is about demand. The argument may even be made that we choose to live here. My view, it is just business taking advantage of a situation that the little people are powerless to change.

Governments work for the people, any time you want to start is fine by me!!

Regards,
Claire English
