Subject: Animal Welfare

The cruelty has to stop. These creatures like children cannot defend themselves from cruel heartless people who don't care. All they care about is themselves and MONEY but that is all. Everything can't revolve around money and profits and making FATCATS rich and allowing them to treat animals with such unforgivable cruelty.

I am one voice against a government who does not care. We need a kinder world for the treatment of animals.

How about making some decisions that will make sure this happen. Don't be swayed by money it is not right.
