Peppermint Grove	\$565.36	\$305.16	\$429.41	\$68.15	\$482.62	\$244.71

Note: there are different reasons for bill variations from billing period to billing period, which are not evident in the data, such as individual household consumption habits, generation output of photovoltaic systems and the impact of weather conditions.

Synergy has previously provided bi-monthly data in response to similar questions in the past. While data is provided on a monthly basis as requested, it should be noted Synergy bills residential customers on a bimonthly basis. As a result, the number of bills sent out in a particular month in some localities may be quite low, therefore distorting the average as it is based on a low sample size.
