**Question or feedback:** Dear Mr Buswell I would like to say that I completely support your stand on the three strikes policy in relation to Public Housing. Our Street has had serious problems in the past because of the antisocial behaviour caused by the tenants of public housing. The problem has been so serious that a number of people have had to sell their own private homes and move on because of this anti social behaviour. Since introducing the three strikes policy, the situation has greatly improved. We would never make a vexatious claim against anyone, but strongly believe that public housing tenants have a responsibility to live in harmony with their neighbours and not destroy their amenity. It is also comforting to know that if public housing tenants act irresponsibly, violently or aggressively (without cause or reason), action can be taken against them. Yours sincerely Aurelio and Zdenka Martelli
