

[Tabled Doc]

The projections in the tables below are current as at Semester 2, 2014 and have been rounded to the nearest 10 students. They are based on historical enrolment figures, trends, and the Department of Treasury's Western Australian population projections. They are used for broad planning purposes and are revised after each biannual student census. Actual enrolments in 2015 to 2017 will differ from the projections.
