

Correction of answer to Legislative Council Question without Notice 395

I have been advised by the Department for Child Protection and Family Support that the answer I provided to this house on the 10 May 2016 in answer to Hon Alanna Clohesy's Question Without Notice 395 was incorrect due to a calculation error as a result of the change in service delivery into three corridors in the metropolitan area.

I seek leave to table the revised answer and have it incorporated in to Hansard.

LEGISLATIVE COUNCIL Question Without Notice

Tuesday, 10 May 2016

395. Hon Alanna Clohesy to the Minister for Planning representing the Minister for Child Protection

As at 31 March 2016 what was the total number of domestic violence places (crisis places and transitional places) available in the East Metropolitan Region for:

- a. Crisis places (families);
- b. Crisis places (single women); and
- c. Transitional places (families)?

As at 31 March 2016, in the Eastern corridor of the Perth metropolitan area there are:

- (a) 35 crisis places for families (these can accommodate single women if required);
- (b) 0 crisis places dedicated for single women only; and
- (c) 22 transitional places for families.

It should be noted that Family and Domestic Violence refuges in Perth accept referrals across the whole metropolitan area. Although there are no services dedicated to single women aligned with the eastern corridor, there are two services aligned with the northern corridor and two services aligned with the southern corridor, equating to 37 crisis accommodation places in the metropolitan area dedicated to single women. In addition, single women can access the services in the eastern corridor that provide accommodation for families too.

The development of services aligned to lead agencies in three corridors in the metropolitan area supports networking and referral between services in a corridor but does not preclude single women and families accessing any service in the metropolitan area.

AK Mitchell

MINISTER FOR CHILD PROTECTION
