

ROADS — PERTH FREIGHT LINK — MEASUREMENTS

3798. Ms S.F. McGurk to the Minister for Transport:

I refer to the Perth Freight Link proposal and I ask:

- (a) what is the width of the road (in lanes) for the whole route, including the road reserve;
- (b) what is the depth and dimensions of the proposed trenches along the Perth Freight Link; and
- (c) what is the location of the trenches along the Freight Link?

Mr D.C. Nalder replied:

- (a) The width of the road in lanes, including the road reserve varies along the route from approximately 7 to 34 lanes.
- (b) The trench dimensions will vary along its length. Dimensions are subject to design development which will provide the best outcome for road users and the community.
- (c) As per part (b), this will be determined during the design development stage to ensure the best outcome for road users and the community.
