

FREMANTLE PORTS — PRIVATISATION

**464. Ms S.F. McGURK to the Minister for Transport:**

I am not sure any elements of my question were answered, but I have a supplementary question. How much will costs on importers and exporters increase if Fremantle port is privatised?

**Mr D.C. NALDER replied:**

That is like asking what the lottery numbers will be this week; I do not know.

**Mr D.J. Kelly** interjected.

**The SPEAKER:** Member for Bassendean, I call you to order for the first time.

**Mr D.C. NALDER:** I am sure the member for Bassendean is more financially literate than what he is expressing at this point in time, because I will tell members what, he has no idea.

Several members interjected.

**The SPEAKER:** Let us move on.

**Mr D.C. NALDER:** We are a responsible government and I will tell members what, this government is getting on, doing things and making things happen. We do not hide around and do nothing for two terms, as occurred at the beginning of this century, which is what we witnessed from a Labor government in this state. We are actually making things happen, but we are being upfront and telling people about them. We have work to do and will get on with that work.
