

WATER — UNDERGROUND AQUIFER NEAR LAVERTON

5315. Mr D.A. Templeman to the Minister for Water:

I refer to the underground aquifer near Laverton, in the Goldfields Region, and ask:

- (a) what is the capacity of the aquifer;
- (b) is the water of drinking quality; and
- (c) is the water available for use outside the Goldfields Region?

**Ms M.J. Davies replied:**

- (a)–(c) There are several underground aquifers near Laverton. If the Member would like more information on a specific aquifer I am happy to provide it.
