

LEACH HIGHWAY/CARRINGTON STREET–STIRLING HIGHWAY UPGRADE — NOISE AMENITY
WALLS

2407. Ms S.F. McGurk to the Minister for Transport:

I refer to the \$118 million allocated in the State Budget 2014–15 for the Leach Highway–Carrington Street to Stirling Highway upgrade and ask:

- (a) does this allocation of funds include noise amenity walls along Stirling Highway from the High Street intersection north to Canning Highway, and if not, why not;
- (b) please detail where the noise amenity walls will be installed and the timeline for this installation; and
- (c) Question Without Notice No. 148 said noise testing is planned as part of the High Street–Stirling Highway upgrade, has this been completed yet, and if yes, what were the results from the testing?

Mr D.C. Nalder replied:

- (a)–(b) The Leach Highway (High Street) Fremantle Upgrade project is now part of the Perth Freight Link project. The scope of the new project is still being determined including the location of any required noise walls.
- (c) Yes. However as the Leach Highway (High Street) Fremantle Upgrade project is now part of the Perth Freight Link, this will require re-modelling to take into consideration the new project scope.
