

Division 49: WA Planning Commission —

[Supplementary Information No A17.]

Question: Mr J.N. Hyde asked for information about traffic modelling for the Perth Waterfront project.

Answer: Supplementary information attached.* As the State Government has confirmed on several occasions, preparatory work will begin on the site following the Commonwealth Heads of Government Meeting in October, with substantial earthworks set to commence in early 2012.

It is intended that Riverside Drive will remain open while much of this work is completed and then closed to complete construction of the inlet.

* [This information was provided to the committee.]
