

AUTISM — SUPPORT FOR CHILDREN AND FAMILIES

Notice of Motion

Mr D.A. Templeman gave notice that at the next sitting of the house he would move —

That this house calls upon the Minister for Health to —

- (a) initiate a review into the way Western Australia addresses and supports families and their children who have been diagnosed with or are awaiting diagnosis of autism; and
- (b) report to the house why waitlists for diagnosis are so long in our state and what he will do to improve the support families and their children require to ensure children on the autism spectrum receive the support they need to reach their full potential.
