

YANCHEP TRAIN LINE — EXTENSION

899. Hon KEN TRAVERS to the parliamentary secretary representing the Minister for Transport:

- (1) How many daily trips is it estimated that an extension of the rail line from Butler to Yanchep will generate in 2031?
- (2) What is the estimated population catchment of the Yanchep extension that this figure is based on?
- (3) How many stations are assumed in calculating this figure, and what are their locations?

Hon JIM CHOWN replied:

I thank the honourable member for some notice of this question.

- (1)–(3) An estimate of daily trips generated by a proposed extension of the rail line from Butler to Yanchep and the estimated population catchment is dependent on a number of factors that have not yet been finalised. These factors include the exact timing of the project and the number of stations built as part of the line extension. Given that the planning for this project has not been finalised and presented to the government for consideration, we are not able to provide any estimates at this stage.
