

DRAFT “PUBLIC TRANSPORT FOR PERTH IN 2031” PLAN — PASSENGER MODELLING

68. Hon KEN TRAVERS to the parliamentary secretary representing the Minister for Transport:

I refer to the passenger modelling used in developing the draft “Public Transport for Perth in 2031” plan.

- (1) What was the level of daily employment at Perth Airport used for the 2008 base case?
- (2) What was the level of daily employment at Perth Airport used for the 2031 preferred scenario?
- (3) What was the figure used for the percentage share of people using public transport to Perth Airport?

Hon JIM CHOWN replied:

I thank the honourable member for some notice of this question.

- (1)–(3) The Department of Planning managed the transport modelling for the draft “Public Transport for Perth in 2031” plan, using the strategic transport evaluation model. The information sought in the question is not readily available to the Department of Transport. It is not possible to provide the information in the time available and I request that the member place the question on notice.
