

BROOKDALE HAZARDOUS WASTE DISPOSAL FACILITY

265. Hon Jim Scott to the Minister for Housing and Works representing the Minister for the Environment and Heritage

Further to my Question without Notice of September 20 2001 on the hazardous waste facility in Brookdale -

- (1) Did Brookdale have large capacity stills to treat solvent wastes when solvents were sent there from the Waste Control site?
- (2) If not, on what planning and scientific criteria or basis was the Brookdale site chosen to treat solvent wastes?

Hon TOM STEPHENS replied:

- (1) The Brookdale Liquid Waste Treatment Facility is not equipped to treat solvent wastes. Solvent wastes from the Waste Control site were only repackaged for treatment at facilities interstate.
- (2) N/A.
