

TRANSPORT — FEDERAL INFRASTRUCTURE PROJECTS

1419. Hon Neil Thomson to the Leader of the House representing the Minister for Transport:

I refer to the recent decision of the Federal Government to review funding for infrastructure projects, and I ask:

- (a) which projects have been cancelled:
 - (i) for those projects, what is their estimated value and what was the Federal Government contribution; and
- (b) which projects have been deferred or had their cash flows adjusted, and:
 - (i) for those projects what are the cash flows before and after the change?

Hon Sue Ellery replied:

- (a)–(b) The Federal Government’s infrastructure investment review is ongoing.

We continue to work with the Federal Government to achieve the best possible outcome for Western Australia.

I note Federal Infrastructure Minister Catherine King’s comments on 6PR on 1 May 2023, where she said “Western Australia and Rita Saffioti has done a pretty amazing job keeping those projects going. Really big infrastructure builds at the envy of the east coast in many cases, so there’s no particular projects that I’ve got highlighted, certainly in the west that I think are problematic.”
