

AMMONIUM NITRATE STORAGE

**182. Hon TOM HELM to the Minister for Mines:**

Further to question 1213 of 31 May 2000 about the storage of ammonium nitrate -

- (1) Is the minister satisfied that his information is correct?
- (2) How is this confirmed?
- (3) Is the minister now aware why there is no obligation to publish emergency procedures?
- (4) Would the minister advise if emergency procedures have now been published?
- (5) If yes, who has copies of the published emergency procedures?
- (6) Is the minister still convinced that bund walls are not required?
- (7) Has the fencing been replaced, or is it still absent for extensions?

**Hon N.F. MOORE replied:**

The member has asked me a number of questions about whether I am satisfied with particular things. Since the question arrived I have not had time to satisfy myself about the issues raised. The Department of Minerals and Energy is satisfied that the information provided in the past is correct. I suggest that the member place the question on notice and I will provide a response after I have had a chance to satisfy myself about these issues.

KWINANA MOTORPLEX PROJECT, FUNDING

**2. Hon J.A. SCOTT to the Minister for Sport and Recreation:**

- (1) Is further funding required to complete the Kwinana motorplex project and, if so -
  - (a) how much; and
  - (b) from where will it be supplied?
- (2) Is the final design of the motorplex the same as was shown to members of Parliament during briefings?
- (3) If not, is the complex largely made up of transportable buildings?

**Hon N.F. MOORE replied:**

- (1)-(3) I have not been able to find out some of the details of this answer. Rather than ask the member to put it on notice, I suggest he ask it tomorrow. By then I will have had the opportunity to discuss two parts of the questions with the officers involved.
