

FIONA STANLEY HOSPITAL — CLADDING — FIRE RISK

1129. Hon Neil Thomson to the Leader of the House representing the Minister for Health:

I refer to question without notice 475 asked in the Legislative Assembly on 7 September 2021 regarding combustible cladding at Fiona Stanley Hospital, and I ask:

- (a) can the Minister confirm that dangerous cladding on Fiona Stanley Hospital has commenced being replaced; and
- (b) when will it be completely replaced, given five years have passed since the Grenfell Tower tragedy?

Hon Sue Ellery replied:

- (a)–(b) Remediation of the Susan Teather Early Learning Development Centre at Fiona Stanley Hospital (FSH) has commenced. Timeframes will be confirmed through the finalisation of the tender processes and results from the full façade burn tests.
