- (2) Nil.
- (3) Acquisition of 11 of the properties is completed and acquisition of the remaining 7 will be completed before the project commences.
- (4) MRS amendments, when required, will be progressed according to the *Planning and Development Act 2005*. However commencement of construction of Roe 8 does not require the MRS amendments to be progressed, as a Planning Control Area for the subject land was declared on 17 November 2015 to protect land required for the Roe 8 alignment. Under Planning Control Area 120 the Western Australian Planning Commission (WAPC) is responsible for determining development applications for construction.
- (5) Timing for initiation of the MRS amendments will be determined in liaison with the WAPC and may await final survey work of the Highway being undertaken so that the reservation reflects the constructed alignment.
