

MANJIMUP HORTICULTURAL RESEARCH INSTITUTE, GRAINS RESEARCH

Hon MURRAY MONTGOMERY to the minister representing the Minister for Primary Industry:

What industry funds are given for the research of grains at the Manjimup Horticultural Research Institute and what are the resulting grains used for?

Hon N.F. MOORE replied:

I thank the member for some notice of this question.

Some \$10 000 to \$15 000 of industry funds has been expended in recent years for the research of grains at the Manjimup Horticultural Research Institute. This has been the Grains Research and Development Corporation component of the cost of summer multiplication of pulses, which will be utilised over the whole of the south west grain-growing areas of the State.
