

SOUTH STREET, MELVILLE-FREMANTLE, COORDINATED TRAFFIC LIGHTS

1050. Hon Jim Scott to the Parliamentary Secretary representing the Minister for Planning and Infrastructure

- (1) What sections of South Street in Melville/Fremantle have coordinated traffic lights for traffic flow?
- (2) If South Street traffic lights are coordinated, when was this done?
- (3) If the traffic lights are not coordinated, when does the Government intend to have this carried out?

Hon KEN TRAVERS replied:

- (1) South Street in Melville and Fremantle has traffic signal coordination between North Lake Road and Gilbertson Road, and between Calley Drive and Karel Avenue.
- (2) Over the last two years.
- (3) Traffic signals which are not actively coordinated on South Street are either too far apart to provide effective coordination benefit, or have incompatible timing requirements.
