

MAIN ROADS WA — PERFORMANCE

640. Hon Adele Farina to the Parliamentary Secretary representing the Minister for Transport:

The *Main Roads Western Australia Annual Report 2012* provides a performance scorecard which shows in multiple areas of Main Roads responsibilities, including Road Safety, Road Efficiency and Management, and State Development very low percentages of contracts being completed on time were recorded, can the Minister please explain why there was such a decline in the number of Main Roads projects being completed on time?

Hon Jim Chown replied:

The results for each of these measures vary from year to year. A full explanation of the measures including reasons for contracts being delivered late as verified by the Auditor General are provided in the 2011–2012 Annual Report.
