

**INDUSTRIAL LAND ALLOCATION**

780. Dr D.J. Honey to the Minister for State and Industry Development, Jobs and Trade:

I refer to the availability of industrial land in Western Australia, and I ask:

- (a) How much unallocated land is still available for development in the State's strategic industrial areas (In Hectares, identified for each SIA separately);
- (b) Of the unallocated land identified in (a), by location, how much land is available for heavy industry (eg. refineries, smelters etc.);
- (c) Are any further SIAs planned for WA and, if so, where are they, what area of land and what uses are being considered for each proposed location (eg. heavy industry, light industry etc.); and
- (d) Does the Government have any plans to designate any land at the Latitude 32 Industry Zone for heavy industry use (refineries, smelters etc.)?

**Mr R.H. Cook replied:**

(a)–(b) Refer to the below table.

<b>SIA</b>	<b>Hectares</b>
Anketell	1,086
Ashburton	1,860
Boodarie	0
Browse LNG Precinct	1,979
Burrup	0
Kemerton	729
Kwinana	0
Maitland	520
Mirambeena	60
Mungari	616
Oakajee	112
Rockingham	49

- (c)–(d) The Government continues to explore areas with sufficient separation from sensitive land uses suitable for heavy industrial uses in response to emerging demand.
