WA ANIMAL WELFARE AMENDMENT BILL 2017- SUBMISSIONS TO COMMITTEE

Dear Minister,

I work as a chef in hospitality where Health and Safety officers come by workplaces unexpected to do a check. I find this to be an effective means pressuring industry standards are implemented on workplaces to keep the public safe from food contamination and illness. But I wonder why the abattoir industry should be any different? This extends to the ethical treatment of animals in abattoirs and ships.

I thank the committee for the opportunity to comment on the proposed Bill. The amendments will dramatically improve the lives of animals and introduce desperately needed transparency and accountability of animal businesses.

This Bill is a big step to improve the legal protections for our stock or companion animals. Since 2012 all other States except WA have adopted the LTS into legislation. It is unacceptable that the industry wants the outdated, irrelevant and ineffective voluntary Codes of Practice to remain.

Standards and Guidelines:

Currently, the Industry follows livestock transport Codes of Practice. Codes are voluntary and it is very difficult to use them to prosecute for cruelty whereas the Standards and Guidelines can be used to prosecute for breaches.

By 2012 all States except but Western Australia had adopted the S&G's into legislation. The Amendment Bill will allow the adoption of the Land Transport Standards and Guidelines into law including the more recent Sheep Standards, Cattle Standards and Sale yard Standards.

Inspections for Compliance:

Unlike Europe, the current WA Animal Welfare legislation does not permit routine, unannounced inspections to ensure compliance at a private business; be that a cat or dog breeding farm, pet bird breeding premise, sheep, cattle, rabbit, pig, poultry farm, feedlot, slaughterhouse, live animal export premise or live animal export vessel. An Inspector may only gain access if they receive a complaint and as a result they believe cruelty may have or is occurring.

The Amendment will allow inspectors to randomly (without notice) and routinely check to ensure that animal welfare legislation is being followed. This is especially significant at this time given the revelations concerning the images of pregnant ewes giving birth on live export vessels to the Middle East.

The community demands transparent and accountable animal businesses. The public want to know the animals (cats and dogs), wool, meat or milk they buy has come from animals who have some legislated protection. It is imperative that WA has strong, enforceable legislation as well as routine checks for compliance.

I urge this committee to recommend that the Bill is passed in the upper house to satisfy community expectation and trust in the pet and agricultural Industry.

Thank you
Zuzanna Alexandra Kania
