

I have learned about food in health

Under 12 (10 years old )

I have good food in my house hold and we can go to the shops

Year 5

I share with other kids

A lot

No I do not need any help to get good food

I feel unfocused, hungry, i still go to school and I feel dizzy

Not many days

I'am not sure about that Idea because I see some kids with not that good of lunch

I think that there should be posters round schools that remind kids to eat healthy and good food each day. Also schools should have certain days that kids either bring healthy food or the school gives healthy and good food to kids
