Subject: Objection - Inquiry into the potential environmental contribution of recreational hunting systems

To whom it may concern,

I wish to strongly object to the proposed policy mentioned above. While hunting animals is legal in WA, no-one can guarantee that only those animals that are considered pests will be harmed and you cannot guarantee that those animals that are legal to hunt will be killed humanely.

How do you intend on policing this policy to ensure that no native animals are not harmed?

I have an understanding of why non-native animals are harmful to our environment but legalising hunting in WA is not the answer in my opinion.

Thank you for your time.

Kind Regards
