

As a young family living 20km out of Kondinin on a farm, school runs in the future would equate to a 40km round trip twice a day. Therefore, the accessibility of a school bus taking our children to the local primary school would be a great support for families living throughout the entire local district as well as a requirement to not only keep the Kondinin Primary School numbers up but also community and social activities alive (e.g. sport clubs, local groups, events, making and meeting friends). We currently see a school bus sitting in Kondinin from Monday to Friday parked up outside the Primary School which, to our knowledge, picks up children from the local district to drop them off at another school 60km away. Due to the fact that we live in Kondinin we would like to have our kids school and participate in sport locally as we strongly believe in the importance of the community. We wish to be able to know that a bus will be available for the local district that we live in from pre school through to the end of primary school. Thank you!
