The Principle Research Officer
Select Committee on End of Life Choices
Legislative Assembly
Parliament House
Perth WA 6000

Dear Dumb Arse Politicians and Dumb Arse Committee Fools,

I Peter Djekil wish to respond to your public enquiry into "End of Life Choices"

I feel that I should submit a few points of fact proof and evidence to you so you can understand what we human beings are.

You fools hold power and therefore authorities this then makes you and anyone who signs their name and pledge to you responsible for whatever bad or good happens on this earth, You all have created a massive gallery style slave ship of this entire planet and its freewill (so called) Human being population

You know nothing about the health and wellbeing of the human mind, the soul, the spirit you know nothing about death or the other worldly afterlife, you know nothing about the health of this planet earth, about nature or the health of our atmosphere.

You are the captains and crew of this earth planet titanic ship

Nations flags all around the world are beginning to fly their country's flag upside down meaning "Nation in Distress" (or ship in distress)

Australia was once the land of milk and honey but now Politicians are responsible for quickly turning it into the land of sewage. You people are so evil and stupid that you are actually going to force population to drink their own sewage (recycled)

Australia is a continent surrounded by ocean, water everywhere and not a drop to drink.

Approximately eight perfectly healthy people of all ages commit suicide every day, they are jumping ship because they cannot tolerate or cope with life.

Massive crime and selfish conduct is the result of not being taught life skills in schools. School curriculums are socially engineered and designed to only teach gallery slaves how to row the oars of industry and money profit.

I could go on and on about what you people are responsible for but now I will tell you what I'm responsible for

I assist anyone who wishes to commit suicide by giving them the knowledge of how to end their life blissfully, Not an act on my part in any way but simply passing on information that can make suicide not horrible.

I advise in conversation to the public that if they are terminally ill and suffering or dyeing and if they are looking for or thinking of an easy way out that the way for this is by drugs.

Not your pharmaceutical expensive controlled drugs but by the drugs we can get anytime we want and as much as we want from our local neighbourhood street corner drug dealers.

There is a drug dealer supplier on just about every street corner in Australia or the world.

Drug lords, drug manufacturers and dealers are all above the law. Your laws and police mean nothing to them as evidence for this is the powerful drug smuggling and supply industry worldwide, Australia wide.

All your efforts to make laws and control orders will be for nothing when a person makes up their mind to "kick the bucket" reinforced with massive pain struggles then there will be no stopping them.

Same thing goes for extreme emotional soul pain (mental illness so called) depression a person can only take so much and then an end to the pain will be whatever they can do.

Self-hanging, shootings, slashings, poisoning, car into trees or head on collisions with trucks, drowning etc. are the order of the day and as for your stupid advertisement campaign R.U.O.K strategy you politicians can P.O.Q.

Your solutions are to pray to a deity that does not exist something you have no proof or evidence of, there is more proof of Santa Clause then there is of Jesus, saints, or gods. Your very judicial system foundation is based on the false knowledge, credibility, proof and evidence of primitive superstitious book the Christian bible; you don't even know the most important thing, what is the meaning of life?

All deaths are suicide, the ^{EXCEPTION} ~~expectations~~ to this fact is instant obliteration by explosive blast or accidental decapitation for example Proof of this is that if a person can tolerate the pain and suffering they will continue to live, when we can no longer tolerate it our will lets go we die.

- A. Example of this is anorexia people who lose the will to on, nothing the doctors do will save them.
- B. Examples are people with only a minor injury or sickness will die and yet someone else with major and catastrophic injury will continue to live this is baffling to doctors and patient carers

So I say to people if you get some cocaine, heroin, ice amphetamines from your urban or rural country drug dealers and take a massive overdose you will have the most fantastic feelings ever to end your life.

I encourage people to do it this way because their way could get other innocent people injured or killed house fire suicide.

That Doctor Phillip Nitchke fellow was trying to do the right thing by the law and by the public but has been very badly persecuted, therefore no more.

The right to die will now forever be conducted by our local drug lab dealers, as a consequence and all you drug addict politicians can P.O.Q

Patients can obtain for a price all the relevant drug administration information, deaths and assistance from the street drug dealers
