Ms Lauren Mesiti Committee Clerk---Herewith my Submission to the above Enquiry

Recreational Hunting is a positive step to remove Feral Animals from National Parks and Forest areas, Any regulation Must be Specific as to the animals to be shot. Eg Feral Pigs, Feral Cats , Foxes, Wild Dogs, any others deemed to be .Pests

Regulations Must be Specific to the Maximum and Minimum Calibre of the firearms to be used, Maximum should be .243 and 270, Minimum should be 222R . I would not allow any of 308 Win or any of 7.62 mm Calibres.

I make these comments with a very long background as a Professional Kangaroo shooter and Feral animal controller.

Kind Regards ,

Bruce Teede
