Subject: RRRRC Waste Composting Facility

17

Attention: Linda Omar
The Chairman
Environmental and Public Affairs Committee
Parliament House
Perth WA 6000

This correspondence is in relation to the odour problem my family and I have suffered due to the RRRRC Waste Composting facility in our area.

Whilst not a 24/7 issue at our house there are times when the stench is absolutely revolting.

We have a lovely patio and pool area that we like to enjoy all year round (except pool), however in some instances the odour is so bad we are unable to enjoy it.

That is, we are forced to retreat inside instead of cooking a bbq or having a nice relaxing drink on the patio enjoying our view of the city.

We also like to entertain our friends and family, this is hampered and sometimes embarrassing when the odour is so bad.

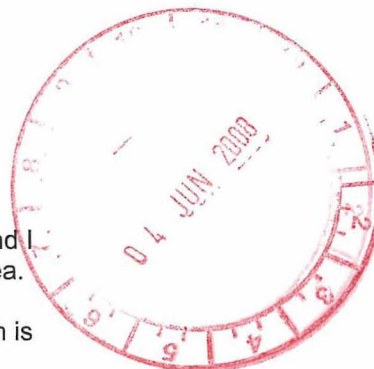

There also times we are unable to hang out washing because of the odour.

Taking the dog for a walk can also be an unpleasant experience when all you can smell is rotting vegetation.

Please take our complaints seriously and commence decommissioning of the site.

Regards,

Scott Warner-Gillon
