

Submission to the **Inquiry into the Student Transport Assistance Policy framework**

██████████

I would like to see our country shires (local govt areas) have buses that run to their school for kids located in that shire.

We live in Broomehill-Tambellup shire and us, along with many others in our community would like to send our kids to Broomehill Primary School.

However due to (history?) the bus takes the Broomehill shire-located kids to Katanning, and denies (current numbers) the Broomehill Primary School of at LEAST 16 kids. This would represent an increase of 40% in student numbers at the school if the bus collected our own shire kids and took them to our town's school

Can this please be looked at – am sure it is not just our community that is affected here.
