Subject: No to shooting animals in WA

Dear Ms Mesiti,

I think its a great idea to shoot feral animals in state forests. The claim that animals are wounded and left to die is just not true. Hunters pride themselves on making clean kills not wounding animals. Foxes, Pigs, Goats and rabbits all contribute to the death of native species of flora and fauna. To rid these feral animal species from our state forests in an act of conservation.

Sincerely
Jim Dawson

Sincerely,

Jim Dawson
