

With the current set up in our area which allows primary school students to get onto the high school buses where seating permits not only affects the local school which has no intake parameters but also puts these young students on a bus full of teenagers. This also adds to journey times for the high school students which is not fair on their out of school time. Please do not allow parents to place their primary aged children on these buses to allow the local primary to thrive rather than worry about closures due to lack of student numbers and funding.
