

In regards to the Cockburn Cement inquiry,

#### Health

In 1989 to 1990 we lived in Magnolia Gardens Yangebup.

My two boys constantly had asthma and were in hospital constantly

I knew then it was Cockburn cement creating this problem! Cars covered in dust, inside was always dusty, washing was a full time job and so was dusting. Just to try and keep the dust down to a low was a job in it self.

We moved to York and not to any surprise the asthma ceased

Medical records can Confirm this.

The wife and myself have moved back to Yangebup as we were place in a homeswest Accommodation and have been here since January 2009.

Since moving back here I my self have been put on spiriva to stop the congestion in my throat and help me breath, I also wake up at night with a dry throat and stuffy nose.

My wife also has a breathing problem now and has been put on ventolin, spiriva and seritide.

We went to Kalbarri for one week and never needed our medicine once.

The second day back the symptoms started coming back.

#### Property

Even today the dust and the fumes where we live haven't changed.

#### Action

I would like to know what you plan on doing with this problem.

1. As I would either move the cement works to another location.
2. Cease there license until they can solve there pollution problem.
3. Put them under a duty of care act and make them liable to law suits.

I hope you don't waste time and be direct, decisive and straight to the point!!!
