Subject: It's a good idea

Dear Ms Mesiti,

I live in Mingenew. Rural Western Australia. The only native mammals left in our national park "Coalseam Park" are large Kangaroos. At night I only see cats and foxes and the odd rabbit . They have wiped out all small native mammals, reptiles and wallabies. Many foxes and cats are mangy and starving as there is little prey left for them. This misguided petition doesn't see the reality on the ground. Every effort to eradicate introduced species must be made including shooting them by recreational hunters.

Sincerely,

Jason Mercer
