

To whom it may concern

I'm submitting my submission because I'm a recipient of the Disability Support Pension and there is no way whatsoever that I could afford to apply, let alone support, regular scripts of Cannabis medicine.

I feel this is blatant price gauging on the Governments behalf!

Cannabis grows like a weed and should be allowed to be grown in people's own gardens, just as aloe vera, thyme, ginger, or any other natural plant is grown.

Pharmaceutical giants are politicising this plant and putting it outside of everyday Australians reach.

It's really quite obscene!

This PLANT, is NOT dangerous!

If we are to demonise such a harmless plant, that has the potential to save billions of lives, why have we NOT banned alcohol or tobacco, which kill billions of Australians everyday?! Absolutely insane and nonsensical!

This madness MUST STOP!

I have been able to reduce my harmful pharmaceutical medications, by 70%!

My GP is supportive of my use as a medicine.

Though not supportive of my recreational use.

This I don't understand.

Being a sober alcoholic, I choose Cannabis over alcohol and it has saved my life!

**STOP THE MADNESS AND LEGALISE THIS LIFE SAVING PLANT.**
