

forced adoption policies and practices were carried out against unwed motherhood

it is not legal adoptions as many are related ..spouse ..orphan etc and they must never be demeaned. adoption is a legal process and not all abducted babies were legally adopted ..many died in foster care or unfit for adoption and placed into institutional care

the policies and practices included the right of mothers to be to relinquish their babies for adoption and they too must be respected

its not about legal adoption ..its about the illegal unlawful and unethical removal of a newborn baby from a young mothers wombs before placenta was extracted without consent or a court order

medical staff guilty of baby trafficking and Commonwealth documents 1959..1964 of all States Attorney General meetings cant be any clearer

Crimes against humanity ..assault and battery ...drugged ..tied down like a prisoner ... tortuous actions that are unimaginable

Reproductive slavery

It is hoped that throughout inquiry mothers voices and truth are heard .. the repercussions of being stripped of their motherhood against their will is unconscionable

Today the abuse many mothers still receive from section of adoptees accusing mothers of abandonment ..is reprehensible and to continue to say all adoptions is also reprehensible

adoptees are not mothers judge and jury therefore it is hoped mothers are respected at all times as they are the only first hand witnesses to the crimes committed

These were crimes and not all adoptions were forced twisting language to conceal truth ..

mothers truth of these crimes is irrevocable and through inquiry education of truth is recorded so it never happens again and mothers voices never silenced again

its hope this inquiry will introduce a redress scheme for mothers who suffered these crimes and to include their stolen sons and daughters

fathers were not legal guardian of an unwed mother's baby and many have stated they did not have a say

its of utmost importance to understand that unless fathers signed the bottom part of the form of birth registration agreeing to paying maintenance and declaring paternity they had no legal stance

we must remember many were rapists ..incestious scum ..priests ..married men ..men who used young girls for sexual exploitation etc thus cowards and many males who argue sperm is more important with a mysognist attitude against women had no legal rights then or today ...excuses it was mothers fault they did not name the father is demeaning and abusing mothers again

Many Adoptees abuse along with many mysognist males blaming mothers are simply condoning crimes that were committed ..brutal. barbaric sexual crimes . stolen babies etc

These barbaric crimes were against young women .young pregnant girls used as medical guinea pigs until a cure was discovered for infertility

As Government funded adoption group stated

we do not support mothers who were separated from their criminally abducted babies

evidence of statement speaks for itself

Government archival documents dont lie ... it happened to young women ...and any adoptee who states we had no choice .. stop blaming mothers ...mothers lives were detonated and destroyed
